Capsule Filling Machine, Automatic

Product Image

Description

A full automatic capsule filling and closing machine, suitable for filling powder/Pellets in hard gelatine capsules. It adopts intermittent motion and multi-position tamping method to

complete capsule orientation, separation, filling, closing and ejection etc. With different size parts, the machine is suitable for size 00,0,1,2,3 and 4 of empty capsules. The production of machine can be controlled by means of a VFD (variable frequency drive). The machine is designed in accordance with GMP standard. All product contact parts are made of SS 316 and machine covered by SS 304.

High Quality product for use in Pharmaceutical Industry and Laboratory. Following is made in compliance with International Quality Standards and are manufactured using high-grade components and materials.
