High Shear Mixer / Homogenizer

Product Image

Description

High Shear Mixers/Homogenizers are commonly used in the manufacturing industry to mix

various components or substances, such as food manufacture, medicines, cosmetics, polymers, and so on. It is highly advanced and adaptable equipment that scatters and grinds a single type of material, such as liquid, solid, or gases. The High Shear Mixer was designed for both ingredient mixing and wet granulation. Our offered mixer is made in line with industry requirements, under the supervision of our professional team, utilizing the highest quality basic materials.

High Quality product for use in Pharmaceutical Industry and Laboratory. Following is made in compliance with International Quality Standards and are manufactured using high-grade components and materials.
